Personal Summary

B. Tech AIML student with hands-on experience in Machine Learning projects like House Price Prediction. Skilled in Python, scikit-learn, and Flask. Quick learner with strong problem-solving and coding skills, aiming to build impactful AI solutions

Education

Bachelor of Technology in Artificial Intelligence & Machine Learning

Chandigarh Group of Colleges, Landran

Duration: 2023 – 2027

Projects

- **House Price Prediction** – Developed a regression model to predict house prices using Python, Scikit-learn, and deployed it via Flask.
- **MindChain** – AI + Blockchain-based decentralized health record platform focused on secure data storage and system design.
- **Diabetes Risk Checker** – Machine learning project built using Python that predicts the risk of diabetes based on key health parameters like glucose, BMI, and age, helping in early detection and awareness.

Technical Skills

Programming:

Python, JavaScript, SQL (Basic)

Machine Learning & Data:

Pandas, NumPy, Scikit-learn, Regression, Classification, Data Cleaning, Data Visualization

Frameworks & Tools:

Flask, REST APIs, Git, GitHub, Jupyter Notebook, VS Code

Web:

HTML, CSS, Bootstrap, Tailwind CSS

Achievements

- **Winner** – Hack the Block Hackathon (ICP, 2025).
- 1st Position in GDG Startup Seed and IOS Ignite .
- **Management Head** – AI & ML driven college club, leading technical initiatives and student-led events.

Certifications

- Python for Machine Learning- Udemy
- Introduction to Machine Learning- Infosys Springboard
- JP Morgan Chase- Software Engineering Job Simulation

Additional Information

- Strong interest in Generative AI, and applied ML systems with experience in hackathons and collaborative technical teams.
